

ARMTEC BA100 “ Cable Balancing Arm Manipulator

Cable Balancing Arm (Soft Arm) manipulators are ideal for rapid movement of light loads. They are light and easy to use. They can handle weights up to 100 kg and reaches up to 3 metres. Cable Balancing Arm manipulators come in many different sizes, reaches and configurations and can be tailor made to suit your application, They can be fitted with a wide range of end effector toolings “ pneumatic grippers, vacuum suction cups, magnets or hooks or they can be supplied with a flange or hook onto which the customer can fit their own tooling.

“

All Posilift supplied Cable Balancing Arm manipulators meet the highest international standards of quality, safety and reliability. All have an Air Reservoir with sufficient air to allow the operator to safely park the manipulator or finish the work cycle in the event of air supply disruption; a Non Return Valve to prevent the Air Reservoir from emptying in case of air supply interruption; a Safety Valve to prevent fast movement of the arm in the event the operator gives the wrong command. All come with “load” and “no load” balancing,
