

Adhesive Rolls

Product Code:

The quality and performance of the adhesive rolls in any [elastomer based web cleaning system](#) is vital to achieve the best levels of contamination removal.

Meech adhesive rolls are manufactured from a moisture stabilised paper base with a release coating to ensure easy unwinding. The paper is coated with an adhesive coating which is specially formulated to work effectively with TransTak elastomer rollers. Meech adhesive rollers have a high adhesive mass, the result of which is longer and more effective cleaning.

Meech adhesive rolls are a continuous roll of 22.4 metres of material with perforations in set positions along the length. The positioning of the perforations gives 70 easily removable (tear off) sections.

Technical Characteristics

Material	Paper
Coatweight	High; accurately controlled
Core size	76mm / 3"
Core material	High impact polystyrene
Perforations	Roll is perforated into 70 removable sections
Total material length	22.4 meters per roll
Available widths	Any roll width up to 1500mm
