

DB3机器人伺服中频点焊机 DB3 Servo MF DC Robotic Gun

随着电子技术、计算机技术、数控及机器人技术的发展，自动焊接机器人，从60年代开始用于生产以来，其技术已日益成熟，

With the technology development of electronics ,computer , numerical control and robotics, automatic robotic welders have become more sophisticated since they were used for production in 1960s.

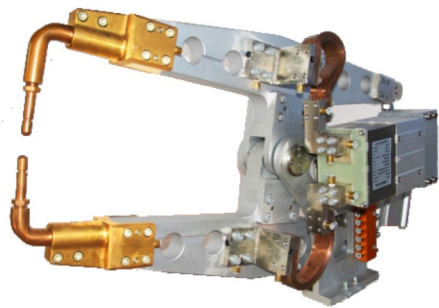

产品优点 Advantages

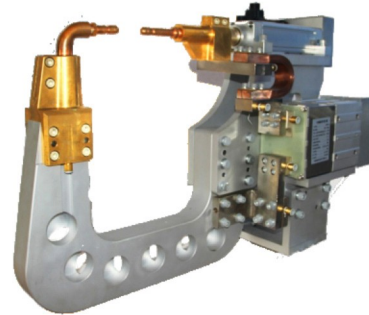

- ▶ 稳定和提高焊接质量，能将焊接质量以数值的形式反映出来；
 - ▶ 提高劳动生产率；
 - ▶ 改善工人劳动强度，可在有害环境下工作；
 - ▶ 降低了对工人操作技术的要求；
 - ▶ 每个焊点的焊接周期可大幅度降低，因为焊钳的张开程度是由机器人精确控制的，机器人在点与点之间的移动过程、焊钳就可以开始闭合；而焊完一点后，焊钳一边张开，机器人就可以一边位移，不必等机器人到位后焊钳才闭合或焊钳完全张开后机器人再移动；
 - ▶ 焊钳张开度可以根据工件的情况任意调整，只要不发生碰撞或干涉尽可能减少张开度，以节省焊钳开度，以节省焊钳开合所占的时间；
 - ▶ 焊钳闭合加压时，不仅压力大小可以调节，而且在闭合时两电极是轻轻闭合，减少撞击变形和噪声。
-
- ▶ Stabilize and improve welding quality, which can be reflected in numerical form;
 - ▶ Improve labor productivity;
 - ▶ Improve the workers' labor intensity and available in a harmful environment;
 - ▶ Reduce the requirements for the operation of workers;
 - ▶ The opening of the welding guns is precisely controlled by the servo robot, the cycle time of welding can be greatly reduced;
 - ▶ It can save much time for decreasing the opening since the guns' expanding can be adjusted according to the working conditions as long as no collision or interference occurs;
 - ▶ When the welding guns closed and pressurized, not only the pressure can be regulated, but also the electrodes can close softly, which will reduce impact deformation and noise.

X型焊钳 X Type Gun

C型焊钳 C Type Gun

Item (项目)	Models (型号)	Unit(单位)	DB3-100	DB3-160
变压器额定容量 Tranformer's Rated Capacity		KVA	100	160
输入电源 Primary Power		V	500V 1000Hz	500V 1000Hz
最大短路电流 Max Shortcut Current		KV	1.6	2.2
最大电极开口 Max Gun Mouth Current's Open		MM	150	250
最大电极压力 Max Electrode Pressure		N	4000	4500
冷却水流量 Flowrate of Cooling Water		L/min	15	15
电极臂材质 Arm Material			铬锆铜 CuCrZr	铬锆铜 CuCrZr
机器人链接方向 Connecting Way Robot			上、下、左、右、后 Up、Down、Left、Right、Backward	上、下、左、右、后 Up、Down、Left、Right、Backward
伺服电机 Servo Motor			KUKA、ABB、台达等品牌	KUKA、ABB、台达等品牌
焊接厚度 welding thickness		MM	0.8+0.8、1.2+1.2、1.5+1.8	0.8+0.8、1.2+1.2、2+2、2.5+2.5
