

电极臂、电极头、电极帽 Electrode

产品详细说明 SPECIFICATIONS

- ▶ 高导电性 -- 电流功率在电极本身损失少，焊接迅速与充分。
 - ▶ 高温硬度 -- 高温下电极不易软化，高寿命。
 - ▶ 材质细腻 -- 材质微观细腻、均匀、每个焊点品质相当，电极品质稳定。
 - ▶ 高抗熔粘性 -- 满足镀层焊接的要求，阻抗镀层粘连达深度焊接。
 - ▶ 综合性能 -- 提高电极的综合性能，焊接可靠性强，焊接适应性强，替代进口电极材料。
- ▶ High conductivity: less current loss of the electrode.
 - ▶ Hardness: thermo stability and long life span.
 - ▶ High quality material: high quality, each welding point is small and firm.
 - ▶ High resistance to melt: meeting the requirements of the coating of welding, resistance welding depth of coating adhesion.
 - ▶ Overall performance: improving electrode performance, reliability and strong welding, soldering strong adaptability
